## Personal Statement

With a strong foundation in business and finance, I have transitioned into the technology sector with a focus on process automation, cybersecurity, and backend development. My hands-on experience in building automation solutions, conducting security assessments, and integrating systems enables me to bridge business and technology effectively. I bring a collaborative mindset, strong problem-solving ability, and a passion for continuous learning. I am eager to contribute to forward-thinking teams that value innovation, security, and operational efficiency.

## Skills & Technical Proficiencies

- Process Automation & RPA: Proficient in UiPath (Studio, Orchestrator), Power Automate, and Excel Macros for streamlining operations.
- Cybersecurity Foundations: Knowledge of network security, risk assessment, IDS/IPS tools, Wireshark, and VPNs.
- Backend Development: Hands-on experience with Node.js, Express, MongoDB, PostgreSQL, and SQL.
- Programming Languages: Python, JavaScript, SQL
- Cloud & DevOps: AWS (Learning), Google Cloud, Docker, Git
- Software Testing & User Feedback: Experience in testing and refinement cycles for automation tools and internal systems.
- Data Migration & Integration: Migrated financial systems with emphasis on security, accuracy, and compliance.
- Business & Systems Analysis: Skilled at aligning business goals with technical solutions and automation strategies.

## Projects & Portfolio Experience (Technovashield, 2023–Present)

Junior Developer | Cybersecurity, RPA & Backend Development

- Developed an AI-driven DDoS Detection System (in progress) to monitor and mitigate cybersecurity threats.
- Created automated retail bots for inventory audits as part of UiPath certification projects.
- Built a basic e-commerce platform with secure payment integration for the New Zealand market.
- Designed a Meditation App with AI chatbot integration to support user wellness.
- Conducted security audits and compiled reports on identified vulnerabilities.

These projects reflect hands-on application of my certifications and personal growth during career transition.

## Addressing My Career Gap (2021–2023)

In August 2021, I faced a personal setback which led to a career interruption. During this time, I reflected deeply, upskilled rigorously in automation and cybersecurity, and redirected my path with renewed focus. I am proud of my resilience, accountability, and growth throughout this period. Today, I bring a strong sense of integrity and a clear commitment to making a positive impact through technology.

## Professional Experience

### Director, Business & Technology Optimization

Jan '09 - Dec '21

Elite Business Group | Auckland, New Zealand

- Led a major financial data migration project, significantly improving operational efficiency.
- Developed Excel Macros for automated financial reporting and analysis.
- Guided the testing and implementation of accounting systems tailored to client needs.
- Championed process automation to minimize manual effort and increase accuracy.

### Financial Controller – IT & Business Systems Support

Jan '05 - Dec '09

Avis Rental Cars | Auckland, New Zealand

- Spearheaded the automation of financial reports, enhancing speed and accuracy.
- Ensured compliance with data security standards in all financial operations.
- Collaborated with IT to develop Excel tools that automated reconciliation and improved financial reporting accuracy.

## Education & Certifications

- PMP Certification (In Progress) – Expected 2025
- UiPath Advanced RPA Developer Certification – 2024
- Google Cybersecurity Professional Certificate – 2024
- Cybersecurity Foundation Course (Microsoft/Coursera) – 2023
- Bachelor of Business (Accounting & Auditing)
